About Me

I am a graduate of Computer Science specializing in software development, with experience in projects that combine programming with 3D graphics. I find the most satisfaction in creating things from scratch, from designing the solution, through implementation, to testing and refining it. I am interested in web technologies, Linux, 3D and VR. Beyond programming, I develop skills in Blender, allowing me to excel at the intersection of programming and creative technologies.

Professional Experience

Intern in the IT Department 06/2018 - 07/2018
Novatek-Electro Poland sp. z o.o., Warsaw
Preparation of guides for the electrical installation IOT devices

Projects

Virtual Museum - PC - VR 2023 - 2025
Unity - C# - Blender (3D)
Project, implementation, performance and usability evaluation of a virtual exhibition of 3D archaeological artifacts in PC and VR environments.

AI Covers 05/2024 - 06/2024
RVC - AI - Audacity
Training voice model and its application for vocal recording to generate singing in the voice of another performer.

Memstagram 01/2024
Java - Spring - JEE - React
Social media application focused on sharing memes, creating profiles, publishing content, and following other users

Barber/Hairdresser Application 05/2023 - 06/2023
Laravel (PHP) - Docker (Swarm)
Application enabling the creation of profiles and promotion of barber/hairdressing services on the internet.

System Integration Application 05/2023 - 06/2023
Laravel (PHP) - REST - SOAP - .NET
Internet application integrating data from Steam and Epic Games Store, enabling registration, login, and data import and export.

Additional Experience

Helpdesk IT P.W. FIREX
Data recovery, computer hardware configuration, software installation

Freelance Designer 3D
Project design and modeling of user objects and figures using Blender (3D) software
